Vienna 50 NG or LP – 15.30" H x 46.71" W

Vienna 60 NG or LP – 15.30" H x 56.71" W

No Limitations

The Technology

- All Contained within the fireplace
- No Gaps
- No Louvres
- No Heat Dump
- Wood and Drywall – Combustibles Okay
- Quick and Simple Installation. No technician required for cleaning inside the glass

No Gap

With a lot of fireplaces, they need to create an escape for the heat to vent out. To do this they leave a gap at the top of the fireplace wall to create a crown to hide the opening. A gap is not necessary.

No Intake or Exhaust Louvres

Your wall will not have any intake or exhaust louvres to break up the look.

No Heat Dump

There are no vents required behind the wall of the fireplace to dump the built up heat.

Combustibles Okay

Everything is contained within the firebox. Able to finish with combustibles around the fireplace. No special concrete board or metal studs

See Heat Shield information on page 17.

SIERRA FLAME SERIES | GAS FIREPLACES

FIRE GLASS

Our decorative fire glass media is a beautiful addition to your fireplace. Turn your fireplace into a expressive work of art by simply adding our decorative fire glass media. Our fire glass adds a distinctly modern feel to your gas fireplace - mix colors and textures for a unique appearance.

Our decorative fire glass is tempered and will not melt or degrade, some discoloration is normal on glass that is placed directly on the flame. Always wear protective gloves when handling fire glass media.

One 5lb container of media will cover 1 square foot.

Note: Sierra flame gas fireplace units can be outfitted with our high quality, realistic looking log sets.

You will find there are more log set pieces in the box than can be used. Every precaution has been taken to ensure the log sets are not damaged in transit - but in the event that there is some breakage there will be extra pieces to use in their place.

Please refer to the set up guide for placement of your log set pieces for proper function and the most realistic display.
